

## Bring Fresh Air Inside

The walls we use to shelter and protect us from the elements also trap airborne chemicals, gases, odour, bacteria and particles. There is a study that suggests that our dwellings may contain air that is 2-5 times, even 100 times more polluted than outside air.

**breathe easier**  
**live better and longer**

## RPS 600SL 6 STAGE ELECTRONIC AIR PURIFIER

The RPS600SL functions as an air cleaner by helping to disinfect airborne microorganisms and removing particulates from the air. RPS600SL is a medical grade system that is one of the most advanced air purifiers on the market.

It is designed with premium in mind, in its beautiful contemporary styling on the outside, its sophisticated technology on the inside, and its airflow performance throughout.

### MEDICAL GRADE AIR PURIFICATION

- 6 Stage filtration
- Large capacity air flow
- Sound volume at an industry low level - 45db
- Washable pre-filter and two stage electrostatic precipitator
- Low maintenance and operating cost
- The RPS600SL is capable of moving approximately 648,000 cubic feet of air per day, enough to exchange the air in a 2,000 sq. ft. home with 8ft. ceilings, an amazing 40 times per day!

## The air is cleansed in six stages:

The washable Pre-Filter traps large dust particles.

The washable two-stage electrostatic precipitator captures airborne particles down to .01 microns. In the ionizing section of the electronic cell, billions of microscopic particles become electrically charged as they pass through the powerful electric field. The collector plates immediately attract and collect these charged dust and dirt particles.

The activated carbon filter adsorbs and reduces odors, chemicals, gases, reduces tobacco smoke and other odors.

The UV sterilization chamber kills bacteria and viral microorganisms such as influenza, TB and Legionnaire's disease as well as other harmful contaminants.

The powerful UV light is reflected throughout the chamber coming in contact with the photo-catalytic filter. This powerful combination quickly and efficiently oxidizes household contaminants into simple water vapor and carbon dioxide. The unit also generates negative ions that freshen the air.

**The RPS600SL is designed to improve your home's air quality, and help you breathe easier.**

**It's like  
Hand  
Sanitizer  
for your  
Indoor Air**

**DON'T IGNORE YOUR HOME'S VERY  
REAL INDOOR AIR QUALITY PROBLEM.**
